## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Flynn (US 6,543,450) in view of Chung (US 6,526,975) and further in view of Olson (US 5,206,956).

Referring to claim 12, Flynn discloses the applicant's invention as claimed with the exception of providing an adhesive band that further comprises a parting covering the user adhesion side when the adhesive band is not in use, wherein the parting is removed when the mask structure is in use and an eye protection that is made from polypropylene. Chung discloses a disposable gas mask that does provide an adhesive band that further comprises a parting covering the user adhesion side when the adhesive band is not in use, wherein the parting is removed when the mask structure is in use and Olson discloses a protective face shield that does provide an eye protection that is made from polypropylene. Therefore it would have been obvious to modify Flynn's invention by providing an adhesive band that further comprises a parting covering the user adhesion side when the adhesive band is not in use, wherein the parting is removed when the mask structure is in use and an eye protection that is made from polypropylene as taught by Chung and Olson in order to protect the face from toxic external environment.
